

Airthings For Business Solution

We spend approximately 90% of our time indoors, where the concentrations of some pollutants are often 5x higher than typical outdoor concentrations.

The Airthings for Business Solution measures toxins and chemicals in the indoor air and lets you understand the instant air quality. The device's sensors monitor **seven key factors** that impact the health of your indoor space.

Key Features:

- ✓ **Quick Installation**
- ✓ **No Cables (Full Wireless)**
- ✓ **RESET certified (Grade B)**
- ✓ **7 Sensors**
- ✓ **Occupancy Indicator**
- ✓ **Virus Risk Indicator**
- ✓ **Professional Dashboard**

24/7
IAQ monitoring
with **real-time**
dashboard

The World's Leading Indoor Air Quality Monitor

The Airthings for Business Solution provides you access to a real-time IAQ dashboard, and actionable insight for your facility management team with a monthly report and alert function.

The Airthings for Business Solution gives you the tools and insight you need to create a healthier, safer, and more productive indoor environment.

TECH SPECS

Dimensions Diameter: 120mm
Height: 36 mm

Weight 220g

Sensors Radon, CO₂, TVOC, Temp, relative Humidity, Air Pressure, Relative Light Intensity (0-100%)

Power 2 AA Lithium batteries

Battery Life Battery Life: 2 years on Lithium
(1.5 years on alkaline)

Operational Environment Temp: 4 °C to to 40 °C
(39.2 °F to 104 °F)

Relative Humidity: 10 - 80 %
(non-condensing)

Measure **Seven** IAQ Parameters **24/7**

Protect Your Facility

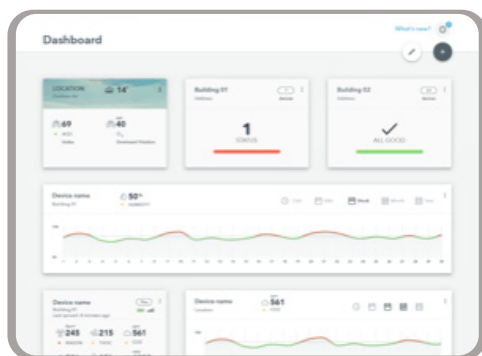

Occupancy Indicator

Understand occupancy trends in your building.

Virus Risk Indicator

Understand which areas have elevated airborne virus transmission risk.

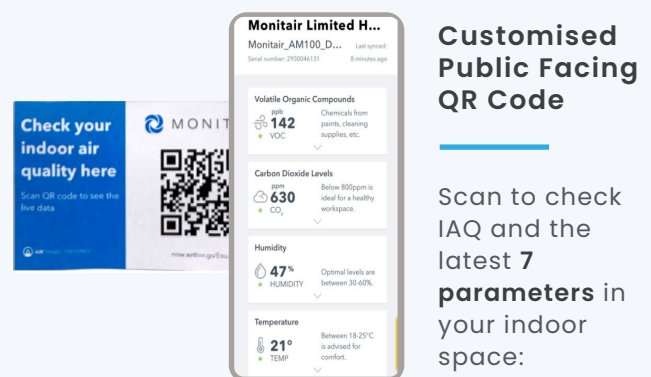

Airthings IAQ Dashboard

Understand the health of your environment at a glance.

Monthly IAQ Report

View IAQ status and indicating areas for improvement.

Customised Public Facing QR Code

Scan to check IAQ and the latest **7 parameters** in your indoor space:

Radon (Rn) - A naturally occurring gas, which can affect the lungs.

Carbon Dioxide (CO₂) - Indoor exposure to carbon dioxide can impair focus, decision-making and productivity.

Volatile Organic Compounds (VOC) - Toxic chemicals can be found in everyday materials. They can cause skin and respiratory irritation.

Temperature - Temperature makes all the difference for productivity, comfort and mood.

Humidity - Too much or too little moisture leads to cold, flu symptoms and risk for toxic mold.

Air Pressure - Helps make for a comfortable indoor environment.

Light Intensity - Optimal Light can positively impact comfort and mood.
